

JARED CHEANG

jared.cheang@u.nus.edu • <https://jach23.github.io/> • <https://www.linkedin.com/in/jared-cheang/>

EDUCATION

National University of Singapore Aug 2023 - Jan 2025

Master of Science in Business Analytics

- Singapore Industrial PhD (EDB-IPP) Recipient

National University of Singapore

Aug 2020 - May 2023

Bachelor of Engineering, Computer Engineering

- Accelerated Masters' Scholarship (Engineering Scholars Program)

WORK EXPERIENCE

Independent AI Safety Researcher

Jun 2025 - Present

- Technical upskilling in AI Alignment modules by self-studying ARENA and completing [ENAS AI Safety Collab Course \(Alignment Track\)](#)
- Engagement in relevant PhD-level coursework on Cooperative AI and Bayesian Rationality (Prof [Tan Zhi-Xuan](#)), AI Uncertainty (Prof [Harold Soh](#))
- [Re-engineered a Theory of Minds model utilising Bayesian Inverse Planning to computationally infer latent social structures within cooperative environments](#)

Government Technology Agency, Data/AI Engineer Intern

Aug 2024 - Feb 2025

- Devised a GenAI tool to resolve limitations of traditional NLP in handling inconsistent data, enabling accurate entity matching for enhanced data analysis through 60% correction accuracy and reconciliation across 55% of dataset previously unmatched
- [Architected plus fine-tuned an LLMs based solution, established a novel evaluation framework integrating quantitative measures and qualitative NLP heuristics](#)

IDEMIA, AI Engineer Intern

Aug 2023 - Apr 2024

- Conducted research on multi-dimensional object detection, harnessing computer vision techniques to optimize immigration application workflows
- Devised a customer analytics system utilizing license plate recognition and vehicle classification solutions to streamline KYC investigations

PROJECTS AND COMPETITIONS

Project RecognEyes, AI Lead

Apr 2025

- [Developed a novel GenAI pipeline to streamline facial composite generation](#), improving efficiency of investigative applications
- Leveraged a blend of fine-tuned image generation models and integrated LLM engines within a Human-In-The-Loop (HITL) framework, awarded \$5,000 as national Innovation Challenge Top 8 Finalists among 90+ teams

COMMUNITY INVOLVEMENT

STEM Genius Coding & Robotics Academy, Principal AI Trainer

Mar 2025 - Present

- Spearheading curriculum and innovation strategy for AI integration, successfully expanding existing robotics and coding modules to include basic AI concepts
- Head Coach of annual National Robotics Competition across numerous teams (elementary and middle school categories), achieved national Top 3

Advisory Singapore (advisory.sg), AI Technical Consultant

Nov 2024 - Present

- Advisor for the design and workflow architecture for AI adoption across subteams, streamlining and accelerating in-house matchmaking operations
- Designed an AI-powered suggestion system to enhance user query responses, leveraging NLP techniques for robust entity extraction and Generative AI for semantic search and contextual recommendation generation

ADDITIONAL INFORMATION

- Languages: English - Native, Mandarin - Fluent
